When you depend upon the quality and effectiveness of the suture in your hand, Sharpoint is a name you can trust. Our proprietary manufacturing process gives us complete control over the quality of every needle that we sell. We set new industry standards with our DermaGlide™ and UltraGlide™ tip geometry. For over thirty years, the Sharpoint name has been synonymous with providing the highest quality needles and sutures to the microsurgical, dermatologic, plastic and ophthalmic communities.

LOOK began manufacturing sutures in the United States in 1936. In its early days, LOOK supplied sutures to prestigious institutions such as MIT and Harvard University. In 1996, LOOK merged with Surgical Specialties Corporation, a world-class manufacturer and innovator. Today, LOOK brand sutures continue to meet the demand of the newest techniques in office surgery, as well as dental and cardiovascular procedures.

In March 2006, Angiotech Pharmaceuticals, Inc. completed the acquisition of American Medical Instrument Holdings, Inc., which was a leading independent manufacturer of specialty, single-use medical devices that included both Sharpoint™ and LOOK™ brand products. Angiotech Pharmaceuticals, Inc. is a specialty pharmaceutical company that discovers and develops innovative treatment solutions for diseases or complications associated with medical device implants, surgical interventions and acute injury or trauma.

This catalog represents all of our ISO Certified Sharpoint™ and LOOK™ wound closure products in one comprehensive resource, and we back up our products with the highest level of customer service found in the industry.

We are always interested in your feedback and new product ideas. Your comments let us continue to expand and improve the products you've come to trust for quality and cutting-edge technology.

INTRODUCTION

HOW TO USE OUR CATALOG

The pages in the suture sections of this catalog will show the following information for each product code. Our ophthalmic products feature an expanded chart with detailed measurements (not shown in this sample) to ensure proper needle selection.

Description - Picture of the actual needle. The SharpPoint™ needle code is blue, LOOK™ needle code is purple, and Ethicon code is in parenthesis. Also lists needle length and shape.

Needle Geometry - Type of needle with cross section reference.

Material - Color and style of suture.

Length - Length in inches. Also indicates the number of strands per package, if more than one.

Size Grid - Indicates the U.S.P. size for each product code listed.

NEEDLE	MATERIAL	LENGTH	SIZE				
			6-0	5-0	4-0	3-0

MATERIALS CHART - This chart shows leading manufacturers' material names.

SharpPoint™/Look™	Ethicon	USS	Material
Plain Gut	Surgical Gut	SurgiGut™	Natural Absorbable Gut
Chromic Gut	Surgical Gut	SurgiGut™	Natural Absorbable Gut
PolySyn FA™	Vicryl Rapide™ (Coated)	————	Coated, Braided Synthetic Absorbable
PolySyn™/PGA	Vicryl™ (Coated)	Polysorb™	Coated, Braided Synthetic Absorbable
Monoderm™	Monocryl™	Caprosyn™/Biosyn™	Coated, Monofilament Synthetic Absorbable
PCL	PDS II™	Maxon™	Monofilament, Synthetic Absorbable
Polyviolene™	Mersilene™ (Uncoated) Ethibond™ (Coated)	Surgidac™/Ti-Cron™	Non-Absorbable, Coated/Braided Polyester
Nylon	Ethilon™	Monosof™/Dermalon™	Non-Absorbable, Monofilament Nylon
Silk	Permahand Silk™ (Coated)	Sofsilk™	Non-Absorbable, Coated/Braided Silk
Polypropylene	Prolene™	Surgipro™/Surgilene™	Non-Absorbable, Monofilament

SUTURE MATERIALS

High-quality, consistently sharp needles.

- ▶ Extra sharp cutting edges extending from the point to its widest portion reduce tissue drag.
- ▶ Precise, smooth penetration through tissue minimizes trauma.
- ▶ Needle channel is fitted to the specific size of the suture material.

Absorbables

PolySyn™/Polyglycolic Acid

The extraordinarily smooth, low friction proprietary coating reduces tissue drag. These synthetic absorbable sutures ensure closure through the critical wound healing period. They retain approximately 50% of their high initial strength at two weeks and 20% of their strength at three weeks. Available as undyed or violet braided and violet monofilament.

SharpPoint™ PolySyn FA™

Developed for short-term closures, SharpPoint PolySyn FA is ideal for skin and mucosa closings that may benefit from fast suture absorption. An undyed, braided Polyglycolic Acid (PGA) suture, it maintains 40% strength at 7 days, 0% at 14-17 days and is essentially absorbed at 49-63 days. It is processed to absorb quickly with little tissue reaction.

SharpPoint™ Monoderm™

This synthetic absorbable monofilament has excellent pliability and handling characteristics. At 7 days it retains 64-76% tensile strength, 40% at 14 days and is essentially absorbed at 90 days. These characteristics make it very popular for subcuticular closure and soft tissue approximation. Available in undyed/clear or violet.

SharpPoint™ PCL

This absorbable monofilament features a pliable construction with extended wound support. It retains approximately 82% of its high tensile strength at two weeks and 77% of its strength at three weeks. Complete absorption occurs as early as 180 days. It elicits minimal inflammatory tissue reactivity to be considered nonirritating. Available in clear or dyed violet.

Non-Absorbables

Polyviolene™/Braided Polyester

The fine braiding of Polyester gives this material an excellent smoothness. Easy to handle, its uniform surface minimizes the trauma. Its high strength and good knot security provide long-term wound support. Available in green and white.

Monofilament Nylon

The monofilament Nylon is a polyamide suture with characteristic high tensile strength. The uniform smooth surface permits easy passage through tissue. Available in black, blue and clear.

Braided Silk

Noncapillary Silk has excellent handling and tying characteristics. Modern braiding technique provides a uniform smooth surface and a greater tensile strength. Available in black and white.

Polypropylene

Inert, smooth, and easy to handle and knot securely, Polypropylene is our most versatile monofilament suture. In addition, a unique extruding technique ensures a uniformly round cross section and a strand that passes easily through tissue with better knot security with less throws.

SURGICAL SPECIALTIES CORPORATION PRODUCTS RETURN GOODS AND ALLOWANCE POLICY

(Effective January 1, 2008)

Authorization for the return of merchandise must be obtained from Surgical Specialties Corporation Customer Service Team by calling 877 991-1110 or 732 626-6466. Any used product must be returned in special packaging. Please contact Customer Service for shipment of a special Biohazard Packaging Kit for the return shipment of used product. Surgical Specialties Corporation will refuse any merchandise returned without an authorization number.

ANY REQUESTS FOR AUTHORIZATION MUST INCLUDE:

- A. Reason for the return: "Ordered in Error," "Shipped in Error," "Product Complaint," etc.
- B. Catalog number(s), quantity, and lot number of each box.
- C. Customer's purchase order number and/or Surgical Specialties Corporation invoice number.
- D. Customer's purchase price.

SPECIAL NOTE: *If a customer cannot provide a purchase order number or a Surgical Specialties Corporation invoice number for the returned merchandise, then credit allowances will be based on previous purchase price history.*

MERCHANDISE THAT WILL NOT BE ACCEPTED:

- A. Merchandise ordered on "Special Order" or "Custom Product" basis.
- B. Merchandise not in standard packaging.
- C. Products not listed in the current Price List or obsoleted/discontinued products.
- D. Merchandise damaged by common carrier, (i.e., Truck, UPS, Parcel Post). Claim must be made against carrier.

ALL CLAIMS FOR SHORT SHIPMENTS:

- A. Must be communicated to Surgical Specialties Corporation Customer Service Team, via telephone or fax, within 30 days from receipt of goods or the claim will not be honored.

PRODUCT EVALUATION SAMPLES:

- A. Surgical Specialties Corporation will guarantee a 100% refund of the purchase price to the end-user customer for any product purchased on an initial evaluation order, if that product does not perform to your current standards. At least 50% of the original contents of the box must be provided to receive this refund. Contact Surgical Specialties Corporation Customer Service Team at 800 523-3332 or 610 404-1000 for additional details.

ALLOWANCE SCHEDULE FOR ACCEPTABLE STOCK RETURNS:

- | | | |
|----|---|---------------|
| A. | Saleable merchandise returned within 60 days of invoice date requiring no reprocessing..... | Full Credit |
| B. | Saleable merchandise returned after 60 days to one year of invoice date requiring no reprocessing..... | Cost Less 40% |
| C. | Saleable merchandise returned within 60 days of invoice date requiring reprocessing, repackaging, etc..... | Cost Less 40% |
| D. | Saleable merchandise returned after 60 days to one year of invoice date requiring reprocessing, repackaging, etc..... | Cost Less 60% |
| E. | Merchandise returned after one year from invoice date..... | No Credit |
| F. | Merchandise unsuitable for resale..... | No Credit |
| G. | Merchandise defective at time of receipt by customer..... | Full Credit |
| H. | Merchandise shipped in error by Surgical Specialties Corporation..... | Full Credit |

NOTES:

- A. Customer must prepay all freight charges on stock returns except for:
 1. Defective material.
 2. Merchandise shipped in error.
 Upon authorization by Surgical Specialties Customer Service Team, merchandise will be accepted freight collect.
- B. Returns from dealers/customers must be handled by contacting the Surgical Specialties Customer Service Team. These returns are subject to all of the above terms.

This policy constitutes the entire policy for Surgical Specialties Corporation and supersedes all prior return goods policies, whether written or oral, with
